

AMA joins hands with i.safe MOBILE to bring remote assistance to explosive hazardous industrial environments

Rennes, France – June 23rd, 2020 – AMA, the market leader in remote support solutions, and i.safe MOBILE GmbH, provider of industrial mobile communication devices, have announced their strategic partnership to improve safety, efficiency and productivity of field teams in explosive hazardous industrial environments.

i.safe MOBILE's intrinsically safe, rugged smartphones and tablets are tested worldwide and certified by renowned notified bodies to be sure that they satisfy all country-specific requirements. i.safe MOBILE's products are ATEX, IECEx, CSA, EAC, etc. compliant and adhere to the most stringent safety protocols and standards set by petrochemical, pharmaceutical, or food industry, to name a few.

AMA's XpertEye remote assistance solution, in combination with i.safe MOBILE's robust devices, brings a new level of performance to industrial workers and will allow them to take full advantage of assisted reality and guided workflows, even in explosive work environments.

"We are committed to providing our industrial customers with robust, secure, and future-proof solutions. Partnering with i.safe MOBILE gives us the chance to accelerate the digital transformation of our customers by deploying new technologies into hazard-rated areas," confirms Guillaume Campion, VP Products and Partnerships at AMA.

"We are very excited to team up with AMA and enrich our customers' experience by offering a remote assistance solution on i.safe MOBILE's rugged devices. Industrial frontline workers will now be able to benefit from unequalled and effective remote assistance," comments Martin Haaf, CEO at i.safe MOBILE.

About AMA

With over 5 years of proven experience in remote assistance solutions, AMA is helping medical and industrial organizations of all sizes accelerate their smart workplace transformation. Our market-leading XpertEye Assisted Reality platform has been deployed in more than 80 countries, addressing a wide range of applications like remote diagnostics, inspection, scheduling and workflow management. These unequaled remote interactive collaboration solutions empower our customers to improve productivity, speed up resolution time, and maximize uptime. Our presence worldwide – with offices in France, Germany, Romania, UK, USA, and China - allows us to work in every time zone and reach our customers wherever they are. amaxperteye.com   

About i.safe MOBILE GmbH

i.safe MOBILE GmbH, is one of the world's leading and most innovative developers of mobile communication devices such as mobile phones, smartphones, tablet PCs etc. for safe use in hazardous areas and for robust use in industry and outdoors. German engineers and specialists develop practice-oriented products and individual, customer-specific software solutions based on legal regulations such as ATEX, IECEx, CSA and EAC. The i.safe MOBILE development team incorporates all international standards into product development. In order to meet all explosion protection requirements, the products are developed from scratch.

i.safe MOBILE also manufactures specially adapted mobile devices for specific requirements in close cooperation with its customers - from the hardware side to individually tailored software solutions, including a maintenance plan.
