

Click and connect to collaborate

Product description

Without downloading an app, our web-based platform instantly enables you to initiate or join an Assisted Reality call from your browser. Simply go to www.xe.live and begin a live, collaborative call in HD with one or more users.

Invite guests to join a secure XpertEye call by sending a link via SMS or e-mail. Joining as a guest is easy - one click and you're in!

Core features

- **One-to-one and conference** video calls either in HD or in challenging low-bandwidth environments
- **Shared workspace:** collaborative board, zoom, pointer in the video stream, import images and PDF's, screen sharing, annotations (text, draw, arrows, etc.)
- **Control the remote user's camera:** zoom, take a picture, flashlight, etc.
- **Confidential mode:** added security option that prohibits users from storing any call data or media
- **Instant messaging**
- **Presence list:** see who is online and search your contact list for instant collaboration
- **Geolocation** of the remote worker
- **Supported languages:** Chinese, English, French, German, Spanish, Italian, Japanese, Korean, Romanian, Russian, Portuguese, Slovenian, Turkish, Polish, Czech, Dutch
- **Use in explosive environments:** Available on ATEX Zone 1, IECEx Zone 1 and CSA C1 D1 compatible devices
- **Connectivity options:** 3G, 4G, 5G, WiFi and satellite connection
- **SSO compatibility** (SAML V2 Open ID Connect)
- **Compatible browsers:** Chrome, Safari and Edge
- **Flexible deployment options:** SaaS, on-premises, private cloud scalable hosting and closed network
- **Secure communication flows:**
 - Hosted on datacenters that are HIPAA and HDS compliant
 - AMA does not store any client data on our servers. All data (pictures, videos, documents, text, annotations) exchanged during a call are deleted once the XpertEye call is finished.
 - XpertEye uses end-to-end encryption technology for data protection
 - Dust Mobile SIM card to protect sensitive mobile communications against threats and cyber attacks

Key benefits

Device agnostic

Works on any connected device (smartphone, tablet or PC)
