

Click and connect to collaborate

Product description

Without downloading an app, our web-based platform instantly enables you to initiate or join an Assisted Reality call from your browser. Simply go to www.xe.live and begin a live, collaborative call in HD with one or more users. Invite guests to join a secure XpertEye call by sending a link via SMS or e-mail. Joining as a guest is easy - one click and you're in!

Core features

- Browser-based
 - **Compatible browsers:** Chrome, Safari and Edge
- **One-to-one and conference** video calls either in HD or in challenging low-bandwidth environments
 - **Up to 4 video streams** in conference calls: to share 4 different point of views. Each view can be controlled remotely to improve understanding
 - **Guest invitation** by email or sms
 - **Conference waiting room**
 - **Confidential mode:** added security option that prohibits users from storing any call data or media
 - **Presence list:** see who is online and search your contact list for instant collaboration
- **Shared workspace:** collaborative board, zoom, pointer in the video stream, import images and PDF's, screen sharing, annotations (text, draw, arrows, take pictures, etc.)
- **Control the frontline worker's camera remotely:** zoom, take a picture, flashlight, white balance and color temperature, camera selection, mute / unmute, etc.
- **Instant messaging**
- **Geolocation** of the frontline worker according to your data security policy
- **Flexible integration options:**
 - A link within XpertEye to up to two 3rd party apps
 - iFrame
 - Co-branding
 - Customized data session IDs
- **Supported languages:** Arabic, Chinese, Czech, Dutch, English, French, German, Hindi, Italian, Japanese, Korean, Polish, Portuguese, Romanian, Russian, Slovenian, Spanish, Tamil, Thai, Turkish
- **Flexible deployment options:**
 - Device agnostic
 - **Connectivity options:** 4G, 5G, WiFi and satellite connection
 - **Use in explosive environments:** Available on ATEX Zone 1, IECEx Zone 1 and CSA C1 D1 compatible devices
 - SaaS, on-premises, private cloud scalable hosting and closed network
 - **SSO compatibility** (SAML V2 Open ID Connect)
 - Capabilities available to customize the application
- **Secure communication flows** (refer to technical documentation):
 - Application hosted on secure datacenters
 - AMA does not store any client data on its servers. All data (pictures, videos, documents, text, annotations) exchanged during a call are deleted once the XpertEye call is finished.
 - XpertEye uses TLS encryption technology for data protection

Key benefits

Device agnostic

Works on any connected device (smartphone, tablet or PC)

Easy & fast setup

Browser-based, no app installation is required

Low total cost of ownership

Pricing is based on floating licenses

Highly secure

HIPAA -compliant, SSL connection, TLS encryption
